MEMORANDUM FOR: Chief, Technical Services Staff

SUBJECT : Request for Continuing R&D to Complete a One Man Portable Hydrogen Generator

1. Description of the Project

The requirement for a portable hydrogen generator is one of long standing. Recent work on this project has resulted in a very successful full scale test of a unit that would fulfill the requirement but it has become evident that low temperature operating parameters of this unit are not known and can not be reliably deduced from the test data. In addition to this low temperature work, it is evident that much greater operating flexibility could be attained by so constructing the unit that it could be placed on dry land and filled with water instead of the present method of floating it on water.

2. Purpose of the Project

The portable hydrogen generator as tested in 1958 will be modified for use on dry land and tests made to determine low temperature operating parameters.

3. Recommended Contractor

The recommended contractor for this work is

4. Support Requirements

There are no support requirements with other government agencies.

5. Estimated Cost

The total estimated cost for this final work on this program is \$15,317, including a fixed fee of \$867.00. Charges are to be made against Allotment Number 9-2502-75-901.

6. Security Information

Contract RD-26 is an Agency sterile contract. Task C is also Agency sterile although government interest may be shown. The item, except in its
